DNSdumpster.com is a FREE domain research tool that can discover hosts related to a domain. Finding visible hosts
from the attackers perspective is an important part of the security assessment process.

this is a HackerTarget.com (https://hackertarget.com/) project

Head over to HackerTarget.com (https://hackertarget.com/) for access to the domain profiler
tool. Enumerate a domain and pull back an XLS with up to 40K subdomains. Get the edge whether
you are chasing bug bounties , red teaming a new target or mapping your attack surface .

Membership includes **9** vulnerabiltiy scanning tools.
Trusted tools hosted for remote easy access.

🗑

Map an organizations attack surface with a virtual *dumpster dive** of the DNS records
associated with the target organization.

*DUMPSTER DIVING: The practice of sifting refuse from an office or technical installation to extract confidential data,
especially security-compromising information.
Dictionary.com

⌄

⚙

More than a simple DNS lookup (https://hackertarget.com/dns-lookup/) this tool will discover
those hard to find sub-domains and web hosts. No brute force of common sub-domains is undertaken
as is common practice for many DNS recon tools. The search relies on data from search engines
and the excellent scans.io (https://scans.io) research project.
